Retired Mexican geologist Felipe Ramos is a prolific critic of the dangers of GMO crops, which he argues cause myriad health problems. In addition to speaking against GMO crops, Ramos is a strong advocate of the ancient Aztec and Mayan ways of eating and living, which he promotes on his website, Ramos lives in a rural area outside Mexico City with his wife, three children and two dogs. Ramos travels throughout the world, speaking about traditional Mexican farming practices and what's wrong with modern methods. SOMA's In Season features conversations with top advocates of simple farming in the United States, Mexico and beyond. One of the many examples that Felipe Ramos gives of the benefits of traditional farming is the regular consumption of fresh egg yolk. Ramos says egg yolk is a nutritional powerhouse and is responsible for good health. He's fond of drinking raw egg yolk with vinegar on occasion. Unfortunately, you're not likely to find many raw egg sellers in your local supermarket. However, if you live in a rural area and are able to visit your local farmers market, you can often find a small farm where you can buy fresh eggs. It's also possible to find raw egg yolk on the Internet.
